**Re: FRP Regional ID #: FRP-3-VA-00978 – Dominion – Yorktown Phase I & Phase II**  
**Plan Review Date: October 16, 2012**

Dear Ms. Taylor:

This letter is to notify you that the U.S. Environmental Protection Agency, Region III (EPA) has approved your Facility Response Plan (FRP), updated September 2012 because it meets the minimum requirements of 40 C.F.R. § 112.20. Your FRP will be maintained in this office while your facility is subject to jurisdiction under the regulations and it will be treated in accordance with 40 C.F.R. Part 2, Public Information.

When changes occur at a facility that materially affect a facility's ability to respond to a worst case discharge, the facility owner or operator is required to provide EPA with a copy of the FRP revisions that address these changes, within 60 days of each material change, as cited at 40 C.F.R § 112.20(d)(1). Facility changes that may materially affect the response to a worst case discharge include:

- (i) A change in the facility's configuration that materially alters the information included in the response plan;
- (ii) A change in the type of oil handled, stored, or transferred that materially alters the required response resources;
- (iii) A material change in capabilities of the oil spill removal organization(s) that provide equipment and personnel to respond to discharges of oil;
- (iv) A material change in the facility's spill prevention and response equipment or emergency response procedures; and
- (v) Any other changes that materially affect the implementation of the response plan.

In addition, facilities are required to provide EPA any changes to personnel and telephone lists included in the FRP, and other changes in the oil spill removal organization(s) that do not materially affect a worst case discharge, in accordance with 40 C.F.R. § 112.2(d)(2). Please include the facility ID number referenced above on any FRP revisions and send your revisions to:
